RE: FOIA Request (EPA-R2-2014-003798)

Dear Mr. Shisha:

The Region 2 Emergency & Remedial Response Division (AKA Superfund Program, ERRD) received a copy of your FOIA Request (EPA-R2-2014-003798) requesting information

“All information identifying any chemicals or substances that were spilled and/or released as a result of Super Storm Sandy (October 2013) at the Phillips 66 Bayway Refinery in Linden New Jersey. Any documents relating to the remediation, and clean up of these chemicals, in November and December of 2013. Any documentation that would identify the substances that were cleaned up and removed by the refinery owners operators and specifically the subcontractor Miller's Launch and Miller Marine, or any chemicals that the individuals hired by Miller Launch or Miller Marine would be exposed to while cleaning and spill.”

All of the responsive files were loaded into FOIAOnline for this request. An invoice in the amount of \$308 was generated and included. Please see the invoice for payment instructions. This FOIA is considered a full grant and will be closed.

Sincerely,

/S/

Robert Keating  
Superfund Records Manager
